RE: White Gold Utility Underground Project

I urging Whistler council to vote to cancel this entirely. The cost has gotten out of hand - now 66% higher projected that what was initially proposed. *And costs never go down!*

My cost would be about \$75,000 over the life of financing this. And this does not include the \$9500 estimated cost to bury the line to my house from the road! These unjust costs should not be imposed on homeowners during these troubled times.

Residences install generators for power backup due to tree downfall. Our house has never had a power outage in the past 10 years we owned here so I see no need for putting lines underground. I'm also not aware of any private generator in White Gold. So why are we doing this?

Council has the authority to quash this so please cancel this out of control project as I do not want it, need it and see no benefit to me.

Sincerely

--
