Honourable Mayor and Council

I am writing this to hope you can vote against the White Gold Underground Wiring Project.

I have lived full time in White Gold since 1981 and do not even notice the above ground wiring. The cost of this project has ballooned way above a reasonable price. We all knew that the initial price was going to go up and will probably still go up before the project would be completed. The long term original residents of our subdivision, who are mostly retired, cannot afford or want this project. I have heard comments re how much better it would be that our power will stay on during high wind storms. I can only recall of one power outage due to a tree falling on a power line in all my years of living here. Only needing just a 51% Yes vote is ridiculous for a neighborhood project. I believe that if you live in a Strata that you need a much larger Yes percentage to get a project approved, so why are we different.

Thank you for your consideration.

Regards
