Whistler City Hall
4325 Blackcomb Way,
Whistler BC V8E 0X5

Attention: Whistler Mayor and Council.

Dear Mayor and Council Members,

The White Gold underground project needs to stop. As a long time resident on Fitzsimmons Road south, and along with many other long time residents here, we see no need for this.

We view it as a **vanity project**, not a practical one. We see realtors/developers buying up properties here, building new houses only to sell them as speculators and move on. And of course they want this underground project as it gives them better 'street view' to sell their projects. Those realtors/developers don't care about the excessive taxes that will be foisted upon long time residents. They just want to take their money and run.

In the years here we have never experienced a power blackout and I am not aware of any generators nearby that would warrant the need for backup power supply.

At your July 5, council meeting I urge you to decide to terminate the project and move onto more needed items by the community.

Sincerely,

A large black rectangular redaction box covering the signature area.

Ian MacDonald
