

Hello,

My name is Keely and I am a volunteer with the Huntington Society of Canada (HSC). I am reaching out on behalf of HSC for the annual #LightItUp4HD 2023 campaign.

Will you help us raise awareness for Huntington disease (HD) by lighting up Fitzsimmons Creek Bridge in blue and/or purple for one or more days in May 2023 for HD Awareness Month?

HD is a fatal genetic disorder that has no cure. HD is often described as having ALS, Parkinson's and Alzheimer's all at the same time. Sites across Canada are helping us raise awareness for HD and Juvenile HD by lighting up in blue and purple, respectively.

The #LightItUp4HD campaign is a wonderful opportunity for those with HD to raise awareness, connect and gain support from their communities.

Please let us know if it is possible to light up Fitzsimmons Creek Bridge in blue and/or purple for one or more days in May 2023.

If yes, please reply to this email with the following information:

- Name, address and website of site
- Contact person's information
- When the site will light up
- What part of the site will light up
- All social media handles for the site so that we can promote your involvement

You can also complete the fillable PDF form attached if you prefer.

If I can answer any questions or provide additional information, please let me know. Thanking you for raising awareness about Huntington disease and bringing connection to the community.

Warmly,

Keely Crawford
