

To Mayor and council,

You guys must be so proud to be the council of a village which allows landlords to charge such disgustingly insane rent costs and contributes to a massive housing crisis in the area, I have seen so many online posts of landlords renting out just beds in shared bedrooms in shared houses for upwards of \$1400 with 4-6 people staying in 1 house and then this yesterday, \$2500 for a bedroom in a shared house. These prices are absolutely disgustingly unacceptable and people cannot afford to pay that. \$2500 a month is almost my entire paycheck I would be left with basically nothing to live with, I work for Vail Resorts who have refused to give me staff accommodation and advised me to seek alternative housing in Whistler, this (screenshot attached) is the alternative housing Vail wants me to look at and it is absolutely shameful, I have never witnessed living somewhere that has such a bad housing crisis and so so many people struggling to find somewhere to live. I'm having to live in a hostel not even in the main whistler villages at a cost which is draining my bank account and it's just not right at all, completely shameful housing situation in such an otherwise amazing place.
