

To the Mayor and Council,

At the recent council meeting's Big Moves Progress update, it was reported that "Evolve e-bikes were ridden for a total of 58,000 km over the summer of 2023."

To offer some context to this figure, I'd like to share that in my first year of year-round ebiking in Whistler, I covered 6,000 km.

This means that the emissions reduction achieved by this initiative could have also been matched by encouraging just ten residents to adopt year-round e-biking.

Kind Regards,

**EDDIE DEARDEN**
