

Dear mayor and council -

Good afternoon,

I'm writing with the deepest respect and appreciation for all the decades of wonderful memories created for so many by rmow.

But, Please help our kids maintain the epic whistler experience we've all loved over the decades. The poop, trash, toilet paper everywhere in the trees between the day lots, its terrible. The families that arrive to enjoy whistler have no options (especially with young children.). A small monetary investment of 6 Porto's during crankworx would largely fix this issue. 3 that stay all summer would do a great benefit to the community. Everyday 100's of children and youth pass through the skills park (skate park area), with no easy access to bathrooms. Also, I'd like to volunteer with my family to clean the forested areas dividing the day lots. They must be cleaned of human fecal matter asap! Myself and others want Whistler to offer to newcomers and youth the same " magical" whistler experience that we love so much. Please help us !

Ps - we need signage at the perimeters of all wooded areas dividing lots 1-4. " please no pooping or peeing the woods ". I'm sure you can word it more eloquently than me. Obviously, first we need a temporary solution -Referring people to the temporary porta potties in lot three.
