26 August 2020

Dear Mayor & Council,

Re: UNDERGROUNDING OF OVERHEAD UTILITY SERVICES IN ALTA VISTA

This letter indicates significant neighbourhood support for the application and cost analysis to bury overhead utility services, in concurrence with the RMOW water and sanitary services upgrade project.

We are requesting the municipality provide relevant information for a formal petition process that the property owners may consider the total cost of this work, minus any available grants.

Background

As the RMOW is undertaking a water, sewer and valley trail upgrade throughout the neighbourhood over the 2020 and 2021 construction seasons, this is a prime opportunity to have overhead utilities installed below ground. The benefits to undergrounding are not only aesthetic but it reduces maintenance costs, reduces storm damage and protects vital services in the case of wildfires.

There are approximately 145 properties in Alta Vista including 2 strata properties and 2 parks. We have made attempt to contact all property owners, without access to tax rolls or property owner information, which during Covid19 has been a daunting task. We have acquired over 138 contacts, including overwhelming verbal and email support for exploring the project feasibility, with only 2 negative responses received. To indicate the general support of the neighbourhood we provide the attached completed forms indicating owners names, signatures and addresses.

Under Section 212 of the Community Charter property owners within a defined area may 'petition' the municipality for local area service, for which the cost may be recovered as an add-on to annual property taxes over a number of years. For a petition to succeed for the whole of that area the petition must be signed by owners of at least 50% of the number of property parcels in the area and those must represent at least 50% of the assessed value of the properties. Should the petition succeed, services will be performed for all properties in the defined area and total cost shared among all property owners.

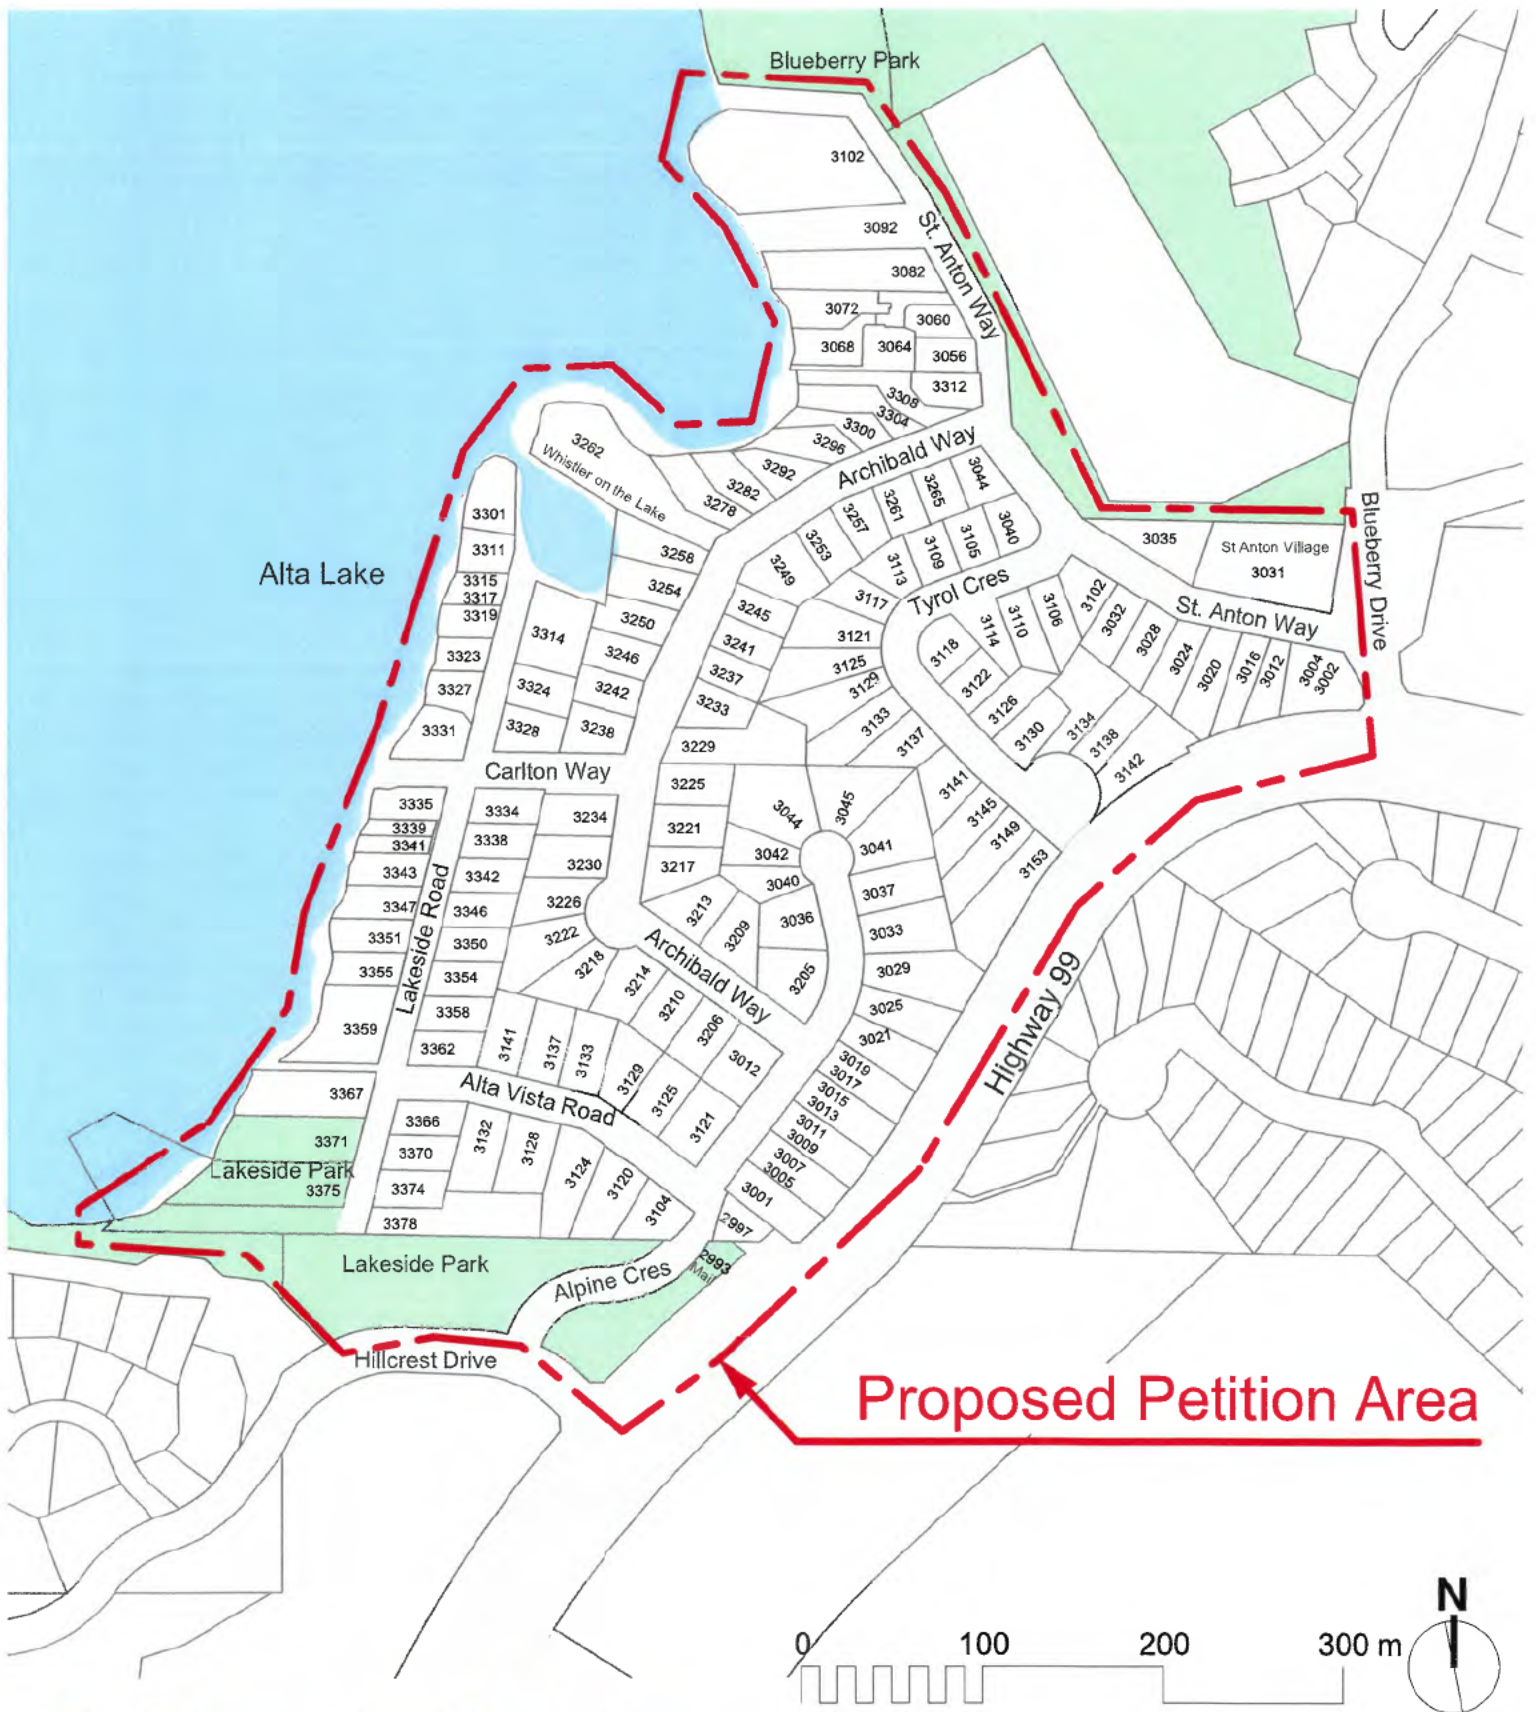

Request

We, the undersigned property owner(s), respectfully request the Resort Municipality of Whistler to:

- Provide information as required under the Community Charter, including the total cost, and or annual cost and any other terms that may be applicable should the project proceed, such that the property owners may formally be petitioned to have these services undertaken.
- Submit an application to the BC Hydro Beautification Grant, which, if successful may provide up to one-third of the total cost of the hydro undergrounding. An initial application is due September 30, 2020 with specifics due by November 30, 2020.

Thank you in advance for your support in creating better and safer neighbourhoods.

[REDACTED]
