Dear Major and Council,

I have lived in White Gold for over 6 years and look forward to many more wonderful years in this incredible friendly and welcoming neighbourhood. I signed the petition in support of the under grounding of hydro wires mainly due to improved fire safety and continuance of power. I am writing council to show my continued support of the under grounding of hydro wires.

I was pleased when Council decided to move forward with the under grounding at their November 3rd council meeting. This made sense as the majority of home owners support this initiative. I am however, surprised that the decision is being reviewed agin.

The laborious and proper procedures were followed to show support of this initiative. The Community Charter was followed and the majority of people have spoken for the project with 93 signing the petition. This well exceeded the level of support (80) required. I recognize the importance of the mayor and council hearing and listening to people for and against this neighbourhood lead initiative. Ninety three home owners signed the petition for the under grounding and a few against the initiative have written letters to council and written some articles in the Pique. In the end, the numbers show that the majority of home owners in White Gold show support for this project.

I respectfully request you to continue to vote in support of this project. Supporting this initiative will uphold the integrity of the community charter, the principles of democracy, and the honourableness of council acting on behalf of the majority of people.

Warmest regards,

Deb Intas, 7345 Toni Sailer Whistler BC V8E 0E3
