**Subject:** Fwd: Support for the Burial of overhead power lines in White Gold

Dear Mayor and council, I have lived with my family in Whistler in the Whitegold neighbourhood for the past 10 years. We are personally invested in our community and plan to be here for many years to come.

I am writing to express my support for the White Gold BC utilities undergrounding project. I was happy to see that the Mayor and council decided to move forward with the project on November 3, 2020.

I was confused and disappointed to see that on November 17 there was a decision made to review this issue.

As you are aware, there was a thorough and detailed process that led up to a vote in our neighbourhood. When the voting concluded a significant majority of the community members expressed a clear desire to move forward with the burial of these dangerous overhead power lines.

I would urge you not to be sidetracked or deterred from the clear mandate that was given. As you know, there will always be a few naysayers who do not like change. And apparently there will always be those who refuse to accept the results of a fair and democratic voting process.

Walk through the neighbourhood for yourself and you will see that clearly, moving forward with this project will in no way be a hardship for any of the residents.

***This project has already been dealt with and should be irrevocably approved once and for all. I trust you will use your good judgement on December 1, 2020 and conclude that your earlier decision was correct and that our community should be allowed to move forward with this much-needed project.***

Thank you in advance for your consideration.

Michael Terrell
