Subject: Asphalt Procurement Decision today

Good day Mayor and Council,

I will keep this short as I know you have a lot on your plates. I would simply like to state my opposition to your potential decision today to consider procuring asphalt for municipal projects from the plant at Cheakamus Crossing. I know the majority of the community is not behind us on this matter but this industry, or any of the sort, should not be located in the proximity of the amount of young families that reside in the area. The extra cost of transportation and environmental impact are minimal compared to the impact on our small, but growing, community.

Thank you for making the right decision today and restoring faith in the system that you all control.

Alan MacDonald
